

Switzerland jobs

Product Manager, Europe - Zurich

This position is based in Zurich, Switzerland.

The area: Product Management

One of the many reasons Google consistently brings innovative, world-changing products to market is because of the collaborative work we do in Product Management. With eyes focused squarely on the future, our team works closely with creative and prolific engineers to help design and develop technologies that improve access to the world's information. We're responsible for guiding products throughout the execution cycle, focusing specifically on analysing, positioning, packaging, promoting and tailoring our solutions to all the markets where Google does business.

The role: Product Manager, Europe

Google Product Managers are results-oriented, and experienced people who help drive Google's products from inception to launch. Google product managers come from a wide range of backgrounds: many have successfully run their own software/web companies whilst others have delivered successful products for large software companies. You will have a great instinct for developing compelling products with a strong academic background and technical aptitude to work with a world class engineering team and the business sense to drive local product goals and strategies.

For immediate consideration, please send a text (ASCII) or HTML version of your resume to jobs@google.com. Important: The subject field of your email must include Product Manager, Europe - Zurich

Responsibilities:

- Launch products
- Identify market opportunities and define product vision and strategy
- Understand customer needs and gather product requirements
- Develop new products and enhance existing products
- Engage closely with the engineering team to help determine the best technical implementation methods as well as a reasonable execution schedule

Requirements:

- Computer Science degree or equivalent experience. Masters or PhD preferred.
- MBA degree highly regarded
- End to end Product Management experience of software / web technologies
- Hands-on software development experience
- Entrepreneurial drive with appreciation of user-experience, business, and commercial issues
- Understanding of the Internet, Search Engine, and On-Line Advertising spaces
