

Nelly Bencomo and Peter Müller
ICSE 2012 Student Volunteers Co-Chairs

February 22nd, 2012

Recommendation Letter

The purpose of this letter is to support the application of **Péricles Rafael Oliveira Alves** to the ICSE 2012 Student Volunteers program. Péricles is under my supervision for about 1.5 year and he has already achieved outstanding research results for a full-time undergraduate student. He published, as the leading author, the preliminary results of his research in the 5th Latin-American Workshop on Aspect-Oriented Software Development (LA-WASP 2011). This year, he submitted a short paper to the **Informal Demonstrations track at ICSE**. Additionally, he is due to submit a journal paper to the Transactions on Aspect Oriented Software Development (TAOSD). Despite being young, Péricles has demonstrated great leadership and ability to help in organizing events. He is also very committed to his tasks in the Software Engineering laboratory which he is member of. His leadership and commitment to help others make him a coordinator of meetings and seminars in the aforementioned laboratory. I can confirm that Péricles is fully proficient in English, both writing and speaking. He has not only written papers but also presented them in English to international audience.

Dr. Eduardo Figueiredo – Lecturer
