Letter of recommendation for Nadezhda Avramova

Dear Student Volunteers Co-Chairs,

As a member of the executive board of Paluno (The Ruhr Institute for Software Technology) of the University of Duisburg-Essen, Germany, I highly recommend Nadezhda Avramova as a student volunteer for the 34th International Conference on Software Engineering (ICSE) 2012. Nadezhda is currently working as PhD student and research assistant in my research group.

I am her academic supervisor for the last 5 years, since she started as a research student in my research group. Nadezhda is highly reliable and I know her to produce high quality results. During her time as research student, she supported my research group in performing exercises and labs on the topics of "Requirements Engineering & Management" and "Software Engineering". As my group is very active in organizing events, she had the opportunity to participate and contribute to the organization of research events, the REFSQ conference 2010 being one of the recent ones, where she once again proved herself to be the right person for such a job.

Nadezhda has shown very good organizational talent. Helping in the organization of research events, she managed multiple tasks at the same time and interacted with participants in order to ensure smooth flow of events. During this job her very good English skills turned out to be just as important as her organizational skills.

I recommend Nadezhda without any hesitations. I am sure that she will contribute to the organization of the conference in the best possible way. If you need further information about her and her work, please feel free to contact me.

Sincerely,

Klaus Pohl
