Subject: recommendation of Federico Tomassetti as a
student volunteer @ ICSE 2012

As Ph.D. supervisor of Federico I am pleased to support his participation to ICSE as a student volunteer.

Federico showed excellent organizational and inter-relational capabilities. In particular, during last year, I was impressed by his ability to start working in two ongoing applied research projects not only catching up with previous work but also proposing original content and collaborating actively with the other project members.

He possesses also outstanding capabilities of team work, which he exhibited both within our research group and while dealing with research and industrial partners.

Federico has good communication capabilities in English, which he demonstrated both in writing scientific papers and in presenting research works at international conferences.

As a summary I strongly recommend Federico as a student volunteer at ICSE 2012.

Best regards,

Marco Torchiano.
