Dear ICSE Student Volunteers Co-Chairs,

I am writing to recommend Mr. Rongxin Wu for the student volunteer program in the ICSE 2012. I am Rongxin's Master thesis advisor. Rongxin's research area is software engineering and he is doing well. He has co-authored many research papers that were accepted by ICSM 2010, FSE 2011, and ICSE 2011. In ICSE 2012, he has co-authored the following paper that is accepted by the SEIP track:

Yingnong Dang, Rongxin Wu, Hongyu Zhang, Dongmei Zhang, and Peter Novel, ReBucket – A Method for Clustering Duplicate Crash Reports based on Call Stack Similarity, in *Proc. 34th IEEE/ACM International Conference on Software Engineering (ICSE'12)*, Zurich, Switzerland, June 2012. (full industry track paper)

During our collaboration work, I found he was not only a gifted and diligent student in software engineering research, but also a student who is willing to help others. I had some visiting students from USA and Korea last year, and Rongxin helped them with their stay in China. Rongxin also helped in organizing some academic activities, such as academic salon, seminars, industry talks, and so on.

Rongxin's English is good. He also visited Hong Kong University of Science and Technology (HKUST) as an intern student in 2010.

I would like to strongly recommend him to join the student volunteer program. If you have any queries, please feel free to contact me at hongyu@tsinghua.edu.cn.

Best regards,
