

Monday. 7th November 2016

The Eleventh International IEEE Workshop on Practical Issues in Building Sensor Network Applications (SenseApp 2016)

The Eleventh International IEEE Workshop on Practical Issues in Building Sensor Network Applications (SenseApp 2016) was held in Dubai, UAE, in conjunction with the 41th IEEE Conference on Local Computer Networks (LCN 2016).

In its eleventh year the workshop attracted 9 submissions with authors from 10 different countries. Each paper went through a rigorous peer review process, with each submission receiving 4 reviews from members of the Technical Program Committee, composed of 23 domain experts from 10 countries, as well as from external reviewers. Based on the referee reports, 5 regular papers were accepted for presentation at the workshop.

We believe that the accepted papers provide interesting results and insights on the use of wireless sensor networks in practical applications as well as valuable reports on experiences in deploying such systems. In addition to the technical papers, the workshop program included an exciting keynote address by Prof. Anura P. Jayasumana.

We would like to thank all the people who worked hard to make this workshop a success. First and foremost we would like to express our gratitude to all the members of the Technical Program Committee and the reviewers for their diligent effort in providing high quality reviews in a timely manner. We would also like to thank the LCN 2016 Organizing Committee and the SenseApp 2016 General Chairs and Steering Committee for their help and support. Special thanks are due to James H. Pope, SenseApp Publicity chair, Olivier Mehani, LCN Workshop Chair, Salil Kanhere, LCN General Chair, as well as Karl Andersson and Frank Huebner, LCN Publications and Finance Chairs, for their help and guidance. Last but not least, we would like to thank the authors for choosing to submit their publications to IEEE SenseApp 2016.
